

Air Valve Enclosure

Description

The A.R.I. Air Valve Enclosure is used to protect air valves in above-surface installations.

The special enclosure hides the air valves and protects them from vandalism and damage.

Main Features

Suitable for A.R.I. combination air valves model D-040 (3/4", 1", 2") and D-050 (3", 4").

Auto-locking mechanism, padlock or both.

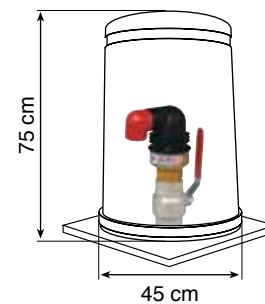

Attaches by screws to a concrete surface.

Made of reinforced polyethylene.

Lift-off design allows full access for air valve maintenance.

Lightweight and durable.

Air vent and drainage slots.
